DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. With respect to claims 1 and 2, the word "means" is preceded by the word(s) "standoff/strap/connector" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3634

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Morris #6,138,792. Morris, as best seen in figure 16, and recited in column 1, lines 43-67, and column 7, discloses a method for attaching a tree ladder assembly to a tree, the ladder assembly comprised of connectable ladder sections 10A, 20A, 30A, 40A, rungs 3, stiles 1A, 1B, straps 61, and strap receiving members 60, which are connectable to the ladder sections at a plurality of positions and permit adjustment of the straps as they are secured to a tree.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Riley #3,116,808, White #4,592,446, Woller #4,991,690, Freund #5,105,908, and Hess #6,516,918 are cited to teach tree stand ladders secured to trees by means of straps, chains, and the like.
